**Rainbow lights** are one of the first products developed by Special FX Lighting's founder, Robin DuCrest. These fun and exciting multi-colored lamps produce an array of color and are best viewed in a frosted sconce or shaded lamp type fixture. They have been used in theme parks, hotels, commercial and residential applications since 1988. All Rainbow Lights are manufactured using a standard 40-Watt A-19 and are recommended for indoor use only. Rainbow Lights are sold to distributors in minimum case quantities of 36, mix or match allowed. Visit our website for a list of dealers.

**The Original Rainbow:** Red/Yellow/Blue

**The Mardi Gras:** Gold/Green/Purple

**The Pastel:** Blue/Magenta/Green
